

Dr. Ceydeli,

Next week will mark a year since my tummy tuck, and I couldn't let this occasion pass without thanking you and your staff once again, for the wonderful service and support you all provided for me during the whole ordeal.

Most of all, thank you for taking my case, even though I probably wasn't the ideal candidate because of my weight and other medical conditions. I can't begin to explain how the surgery has changed my life. I no longer cringe when I look in the mirror. I'll never be thin, and will always fight my tendency to gain weight, but when I look in the mirror now, I feel beautiful for the first time since my oldest daughter was born 21 years ago. I wore a two piece swimsuit to the beach this summer on several occasions—something I haven't done since I was 18! I no longer have to make sure my shirts are extra long to cover my tummy bulge, and no longer have to wear pants a size too big because they have to be large enough to button over the fat roll. ☺ All of that seems so trivial, but had such a negative effect on my self esteem. I am SO pleased with the outcome, and the care and the professionalism from you and your staff.

THANK YOU, THANK YOU, THANK YOU!!!!!! You changed my life.
